Mahmoud Hassan

Junior Full-Stack Developer | React & Node.js | AI

Menoufia, Egypt — 01094210986 — mahmoudalassiouty1@gmail.com
github.com/Mahmoud-Elassuty — mahmoud-elassuty.github.io/Portfolio — linkedin.com/in/mahmoud-hassan17

Objective

Junior Full-Stack Developer and Computer Science student with hands-on experience building responsive web interfaces and full-stack applications. Strong foundation in HTML, CSS, JavaScript, React, Node.js, Express.js, REST APIs, databases, Git/GitHub, Docker, and modern UI development, with additional experience in Python/FastAPI, Elasticsearch, Power BI, and AI-assisted development workflows. Seeking an internship or junior Full-Stack / React / Node.js opportunity to contribute to real products and grow production-level engineering skills.

Target roles: Junior Full-Stack Developer, Junior React Developer, Junior Node.js Developer, Web Developer / Software Engineer Intern.

Education

Menoufia University — Faculty of Computers and Information *Expected Graduation: 2027*
B.Sc. in Computer Science
Relevant Areas: Software Engineering, Databases, Information Retrieval, Data Science, E-Business & AI

Work Experience

Independent Projects & Practical Development *Full-Stack / Web Development*
Developed and deployed personal web projects, practicing modern JavaScript and React development while working with REST APIs, Git/GitHub, Docker, backend services, search technologies, and data-oriented tools.

Courses

Web Development Using React JS — In Progress *Information Technology Institute (ITI)*
Accepted into ITI's Web Development Using React JS training, focused on modern front-end development, React.js, and practical front-end engineering.

React Frontend Web Developer Track — In Progress *Digital Egypt Pioneers Initiative (DEPI) — Rwad Misr*
Participating in a 12+ topic web development/React-focused learning track covering web fundamentals, UI/UX, modern JavaScript, React, TypeScript, Git/GitHub, design patterns, backend foundations, DevOps foundations, testing/documentation, and AI-assisted development, culminating in a capstone project.

Certificates

Training and course certificates available upon request.

Skills

Proficient in 45+ technical skills and tools across front-end, backend, AI, and data domains.

Hard Skills

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React, Bootstrap, Tailwind CSS, Responsive Web Design, Flexbox, CSS Grid, DOM, Browser APIs, Local Storage, Regular Expressions
- **JavaScript:** Functions, Arrow Functions, map, filter, reduce, forEach, Objects, Spread Syntax, Set, Map, Events, Form Handling
- **Backend:** Node.js, Express.js, REST APIs, JSON, Python, FastAPI
- **Databases & Data:** SQL / Databases, Elasticsearch, Kibana, Power BI
- **AI:** AI-assisted development, Generative AI tools, prompt-based development workflows
- **Tools:** Git, GitHub, VS Code, Postman, Docker, Docker Compose, Browser DevTools
- **Software Engineering:** UML, Software Engineering, API design, testing/documentation fundamentals

Soft Skills

- Problem Solving
- Communication
- Teamwork

- Adaptability
- Self-Learning
- Attention to Detail
- Debugging
- Time Management (balancing university coursework with two concurrent professional training tracks)

Projects

Completed 7+ personal and academic projects spanning front-end, full-stack, search, and data visualization.

Personal Portfolio Website *HTML, CSS, JavaScript*

Developed and deployed a responsive personal portfolio website, organized into 5 sections covering projects, technical skills, and professional training, built with semantic HTML and responsive CSS for cross-device usability.

Mini Search Engine *FastAPI, Elasticsearch, Docker, REST APIs*

- Built a full-stack search engine supporting 15+ product records with full-text and fuzzy search.
- Implemented 5+ search functionalities including highlighting, filtering, pagination, fuzzy matching, and relevance-based ranking.
- Exposed functionality through REST API endpoints returning JSON, fully containerized with Docker Compose.

Educational Full-Stack Platform — MVP *Full-Stack, JSON/API Integration*

- Designed an educational platform MVP covering 10+ core features, including authentication, course management, cart, checkout, and enrollment.
- Built lesson management, video progress tracking, reviews/ratings, and an admin dashboard, structured around reusable front-end components and scalable full-stack functionality.

E-Commerce Store *React / Modern Frontend*

Developed an online-store interface with product browsing, categories, product details, and cart/checkout-oriented flows, focused on responsive UI, reusable components, and clean navigation.

Pharmacy Website *Arabic Responsive Web Interface*

Designed a modern Arabic pharmacy website concept with responsive layouts, product/service presentation, contact-oriented flows, Arabic typography, and mobile-friendly UI.

Business / Landing Page Projects *Responsive Web Design*

Built responsive landing-page concepts for multiple business use cases with modern layouts, clear CTAs, and reusable UI sections, practicing conversion of design references into functional web interfaces.

Power BI Sales Analysis *Power BI, Data Visualization*

Analyzed 3 linked datasets (sales, products, and employees) to design business-focused dashboards and reports visualizing key sales metrics.

Activities

- Applied 6 major UML diagram types — Use Case, Sequence, Class, State, Activity, and Component — in Software Engineering coursework projects.
- Managed version control and deployment for personal projects using Git and GitHub, maintaining source code and project history through repositories.
- Completed hands-on JavaScript development practice covering DOM manipulation, events, Browser APIs, Local Storage, objects, array methods, and form handling.
- Practiced AI-assisted development workflows for research, coding support, debugging, and productivity.
